1101500_100-1101500 ((inapplicable))

Last updated: 2025-08-18 by DC OceanOPS

Station characteristics

Station alias:	1101500_100
Date established:	2025-08-18
Date closed:	2016-11-21
Declared reporting status:	Silent
Assessed reporting status:	Unknown
Station type:	Sea (mobile)
WIGOS Station Identifier(s):	0-22000-100-1101500 (Primary)
Coordinates:	12.9800°N, 46.1970°E, 0m, (unknown)
Supervising organization:	Scripps Institution of Oceanography
Station URL:	https://www.ocean-ops.org/board/wa/Platform?ref=1101500_100
Site description:	Ship type: Container ships

Programs / network affiliations

Note: OSCAR/Surface regularly receives from external systems the assessed status of certain programs. The validity of received assessment is shown in the expanded view. If a new assessment is not available after a certain time OSCAR/Surface shows the status *"unknown"*. For programs that are not assessed OSCAR/Surface displays the status "unknown".

Program / network affiliation	Program specific ID	Affiliation status	Declared status	Assessed status
DBCP others	1101500	Approved	Non-reporting	Unknown
SIO-DB	1101500	Approved	Non-reporting	Unknown

Observations / measurements

Ocean > Physical properties

Sea surface temperature - [Geometry: Point]

Variable:	Sea surface temperature
Geometry:	Point
Programs / network affiliations:	DBCP others SIO-DB
Last updated:	On 2021-10-11 by DC OceanOPS

Deployments

From 2016-11-08 to 2016-11-21

Instrument characteristics

Manufacturer:	GENERIC
Model:	GENERIC_SST THERMOMETER
Observing method:	(unknown)
Observable range:	unknown
Relative uncertainty:	unknown
Absolute uncertainty:	unknown
Drift per unit time:	unknown
Specification URL:	unknown

From 2016-11-08

Instrument characteristics

Manufacturer:	(unknown)
Model:	SST_OTHER
Observing method:	Radio detection and ranging (Radar)
Observable range:	unknown
Relative uncertainty:	unknown
Absolute uncertainty:	unknown
Drift per unit time:	unknown
Specification URL:	unknown
